

Behrooz (Bruce) Ferdowsi, Dr. sc. ETH Zurich - CV

CONTACT INFORMATION

Earth and Environmental Science, University of Pennsylvania
Sediment Dynamics Laboratory, 58A Hayden Hall
240 South 33rd Street, Philadelphia
PA 19104-6316, USA
E-mail: behrooz@sas.upenn.edu
Research homepage: <http://behroozf.github.io>
Web profiles: [Google scholar](#), [ResearchGate](#)

RESEARCH INTERESTS

- Earth surface dynamics, sediment transport and fluid-driven/sheared granular matter
 - Granular physics (friction, creep, segregation) and rocks physics (creep, stick-slip) across the scales
 - Fundamental mechanisms of landscape evolution (hillslope creep, slow and fast earth flows)
 - Earthquake triggering phenomenon (dynamic and static) and induced seismicity
 - Computational methods: Molecular Dynamics, Discrete Element Method simulations
 - Statistical mechanics and nonlinear dynamics applied to granular materials
-

EDUCATION

ETH, Swiss Federal Institute of Technology, Zürich, Switzerland

Ph.D. (Dr. sc.), Civil and Environmental Engineering, Jan 2011 - Oct 2014

- Dissertation title: "[Discrete element modeling of triggered slip in faults with granular gouge: application to dynamic earthquake triggering](#)"
Advisor: Prof. Dr. Jan Carmeliet (ETH Zürich)
Co-advisor: Dr. Michele Griffa (Empa, ETH Domain)
- My PhD project was carried out in collaboration with a directed research project at the Los Alamos National Laboratory [Nonlinear Geophysics](#) department focused on dynamic earthquake triggering phenomenon.

Tehran Polytechnic, Iran

M.Sc., Geological Engineering, 2007-2010

University of Guilan, Iran

B.Sc., Civil Engineering, 2003-2007

ACADEMIC COURSE **University of Pennsylvania, Philadelphia, USA**

Postdoctoral fellow (Earth and Environmental Science)

February 2015 - present

- Sediment Transport, fluid-driven granular matter, hillslope deformation (mentor: Prof. Doug Jerolmack)
- Rock friction, granular mechanics of earthquake fault gouge (mentor: Prof. David L. Goldsby)

National Center for Earth-surface Dynamics, Minneapolis, USA

Synthesis Postdoctoral fellow

February 2015 - present

- Stochastic processes of sediment transport (mentors: Profs. Doug Jerolmack and Chris Paola)
- Building stratigraphy grain by grain (mentors: Profs. Doug Jerolmack and Chris Paola)

University of Alberta, Edmonton, Canada

Researcher at Microseismic Industry Consortium

October 2014 - February 2015

- Geomechanical modeling of induced seismicity and triggered failure in granular sandstones
- Hazard assessment of potentially induced seismic activities
- Increasing efficiency of hydraulic fracturing treatments

ETH, Swiss Federal Institute of Technology, Zürich, Switzerland

Graduate Student and Research Assistant

January 2011 - October 2014

University of Edinburgh, Edinburgh, Scotland, UK

Research Assistant

September 2010 - January 2011

Tehran Polytechnic, Tehran, Iran

Teaching Assistant

February 2008 - May 2010

PUBLICATIONS

Three dimensional discrete element modeling of cyclic undrained behavior of granular media: a micromechanical perspective
 Powder Technology, **212**(1), pp. 1-16 , 2011.

PAPERS IN PREPARATION

- B. Ferdowsi, C. P. Ortiz, M. Houssais, D. Jerolmack
From surface to subsurface and back again: the contribution of subsurface particle motion to surface armoring
 In internal review to be submitted to PNAS (planned submission: March. 2016)
- B. Ferdowsi, C. P. Ortiz, D. Jerolmack
Creepy landscapes: the granular origins of soil transport on hillslopes
 In preparation for Nature Geoscience (planned submission: June. 2016)
- B. Ferdowsi, D. Jerolmack, D. L. Goldsby
A granular perspective on the rate and state frictional behavior of earthquake fault gouge
 In preparation for Review of Geophysics (planned submission: early 2016)
- D. Lee, B. Ferdowsi, D. Jerolmack
Dune deformation dynamics reveal a topographic signature of life
 In internal review to be submitted to Nature Geoscience (planned submission: early 2016)

RESEARCH FUNDINGS

- Southern California Earthquake Center (SCEC), Science Collaboration Grant: “Physical controls of spontaneous and triggered slow-slip and stick-slip at the fault gouge scale”; PI: Prof. David Goldsby (Department of Earth and Environmental Sciences, Penn); Co-I: Behrooz Ferdowsi; in collaboration with Prof. Chris Marone (Dept. of Geosciences, Pennsylvania State University) for experimental observations. (\$25300, approved)

TALKS AND CONFERENCE PRESENTATIONS

- July 2016, Stonehill College, Easton, MA, USA - Gordon Research Conference: Particulate Systems in Science and Technolog. *Granular segregation in an experimental river* (poster)
- December 2015, San Francisco, USA - American Geophysical Union Fall Meeting. *Granular controls of hillslope deformation and creep* (poster)
- December 2015, San Francisco, USA - American Geophysical Union Fall Meeting. *From surface to subsurface and back again: the contribution of subsurface particle motion to surface armoring* (Invited talk)
- December 2015, San Francisco, USA - American Geophysical Union Fall Meeting. *Controls on Dune Deformation Patterns in White Sands, New Mexico* (2nd contributor to a poster by Dylan Lee, PhD student at PennSeD)
- September 2015, Palm Springs (CA), USA - Southern California Earthquake Center (SCEC) Annual Meeting, *The granular origins of rate and state friction behavior of fault gouge* (poster)
- June 2015, Clark University, USA - 13th Annual Northeastern Granular Materials Workshop. *Segregation dynamics in fluid-driven annular couette flow: contribution of subsurface processes to surface armoring in an idealized riverbed* (poster)
- May 2015, University of Delaware, USA - 2015 AMTRAK Soil to Sea Meeting. *From surface to subsurface and back again: the contribution of subsurface particle motion to surface armoring* (poster)

— January 2015, University of Alberta (Exploration Seismology, Department of Physics, Dr. Mirko van der Baan), Canada. *Geomechanical modeling of induced seismicity* (presentation by Behrooz)

— May 2014, University of Maine (Group of acoustics and mechanics of materials, Lead by Dr. Vincent Tournat), France. *Acoustically-induced unjamming and slip triggering in sheared granular layers* (presentation by Behrooz)

— November 2013, Yale University (School of Engineering and Applied Science, The O'Hern group), USA. *DEM modeling of slip triggering in a sheared granular layer* (presentation by Behrooz)

— November 2013, Pennsylvania State University (Department of Geosciences), USA. Dynamic Triggering of Earthquakes, a seminar organized by Dr. P. A. Johnson (LANL) and Prof. C. Marone (Penn State). *DEM of a sheared beadpack* (presentation by Behrooz)

— June 2013, Ascona, Switzerland - The 18th International Conference of Nonlinear Elasticity of Materials. *MD simulation of slip triggering in sheared granular layers by boundary vibration* (presentation by Behrooz)

— February 2013, Les Houches, France - The 2nd winter school on "Materials Deformation: Fluctuations, Scaling, Predictability. *3D MD modeling of slip triggering in sheared granular layers by means of boundary vibration* (poster by Behrooz)

— October 2012, Bayreuth, Germany (University of Bayreuth) - The 17th Fall Seminar on Nonlinear dynamics. *How vibration changes the spontaneous stick-slip dynamics of a sheared granular layer* (poster by Behrooz)

— August 2012, Lausanne, Switzerland (EPFL) - CCMX Summer school on Multi scale modeling of materials. *Evolution of recurrence time and energy release during spontaneous and perturbed stick-slip dynamics of a granular layer* (presentation by Behrooz)

— July 2012, Graz, Austria (TU Graz) - The 8th European Solid Mechanics Conference. *How external vibration affects stick-slip dynamics in sheared granular layers: the micro- and meso-mechanics of dynamic earthquake triggering* (presentation by Behrooz)

— June 2012, Cefalù, Italy - The 17th International Conference on Nonlinear Elasticity in Materials. *3D molecular dynamics simulations of triggering of slip in stick-slipping, sheared granular media by means of external vibration: learned lessons for dynamic earthquake triggering* (presentation by Behrooz)

— April 2012, Vienna, Austria - European Geoscience Union (EGU) General Assembly Conference. *Meso-scale analysis of deformation patterns for dynamically triggered slip in sheared granular layers* (presentation by Dr. Griffa)

— January 2012, Les Houches, France - Winter school on "Materials Deformation: Fluctuations, Scaling, Predictability. *Deformation pattern and evolution of the internal structure of granular media during stick-slip dynamics: micromechanics of dynamic earthquake triggering* (poster by Behrooz)

— December 2011, Enschede, Netherlands (University of Twente) - invited by the Multi-Scale Mechanics (MSM) group. *Stick-slip and anisotropy of granular structure* (talk by Behrooz)

— June 2011, Cairns, Australia - Instabilities Across the Scales III. *Granular stick-slip and the micromechanics of dynamic earthquake triggering* (talk by Prof. Carmeliet)

— May 2011, Kowloon, Hong Kong (Hong Kong Polytechnic University) - The 14th Asian Regional Conference on Soil Mechanics and Geotechnical Engineering. *Study of the cyclic constant volume loading of the granular media from micromechanical aspects: effects of confining pressure and cyclic strain amplitude*

— August 2010, London, UK (Queen Mary University of London) - The 5th International Conference on Discrete Element Method. *Effect of gradation on the constant volume cyclic behavior of granular media*

— November 2009, Barcelona, Spain (Technical University of Catalonia; UPC) - Particles 2009. *Three dimensional discrete element modeling of undrained monotonic and cyclic response of granular media*

HONORS AND AWARDS

— Award for best contribution, The 18th International Conference on Nonlinear Elasticity in Materials, Ascona (Centro Stefano Franscini of ETH Zurich) in Switzerland, June 9-14, 2013.
[CSF Awards 2013](#); [photo](#)

— Scholarship from Deutsche Forschungsgemeinschaft (DFG) for attending the 17th Fall Seminar on Nonlinear Dynamics at the University of Bayreuth, October 7-10, 2012.

— Scholarship for attending the Les Houches (France) winter school on Materials Deformation: Fluctuations, Scaling, Predictability, 22-27 January 2012.

— Swiss National Science Foundation (SNSF) fellowship for PhD studies at ETH Zürich (2011-2014)

— 3 years fellowship for PhD studies at the University of Edinburgh (Marie Curie (EU) fellowship) (2010-2013) - Declined

— TA/RA fellowship for PhD studies at the University of Minnesota (2010-)

— 4 years fellowship for PhD studies at the University of Southern California (2010-2014) - Declined

PROFESSIONAL AFFILIATIONS

— Regular member, Southern California Earthquake Center (SCEC), 2015-present

— Regular member, American Geophysical Union AGU, 2015-present

— Synthesis postdoctoral fellow, National Center for Earth-surface Dynamics, 2015-present

— Regular member, Swiss Geological Society, 2013-2015
